AI EXPLAINED SIMPLY

Summarize a 1-Hour Meeting in 1 Minute With Free AI: the Prompt Pack

A short, copy-and-paste method. No numbers to trust, just a workflow you can check yourself.

The 3 steps

1. **Record** the call with the free recorder built into your meeting app (ask everyone's permission first), and save the audio.
2. **Transcribe**: drop the audio file into a free speech-to-text tool. You get the full transcript.
3. **Summarize**: paste the transcript into any free AI chat with one of the prompts below.

Prompt 1: the basic summary

```
Summarize this meeting in five bullet points. List every decision, and who owns
```

Prompt 2: the verification line (the trick)

```
For every point, quote the exact line from the transcript that supports it.
```

Now you can check each point. If a quote is not in the transcript, the AI made it up: delete that point.

Prompt 3: action items only

```
From this transcript, list every action item as: task, owner, deadline (write "
```

Prompt 4: follow-up email

```
Write a short follow-up email from this summary: decisions first, then action i
```

Prompt 5: what was left open

```
List every question or topic that was raised but not decided. Quote the line fo
```

Good habits

- Always get everyone's permission before you record.
- AI summaries can be wrong: always read the quoted lines for important decisions.
- Do not paste confidential meetings into a tool your company has not approved.
